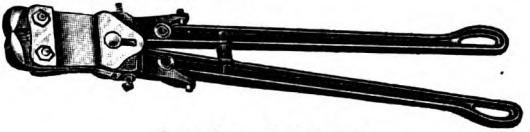
# Carolus Bolt Cutters, Wire Clippers and Nut Splitters

Style A

Straight Cut

Carolus Bolt Clippers will cut nuts, bolts or iron at almost any angle anywhere. Built for repair work on furnaces, stoves, wire fences, wagons, buggies, harness, autos, all kinds of machinery, etc. It is just the clipper for electricians and manufacturers of all kinds; and especially needed in cement construction work and railroad repair shops.

Note how rigidly the jaws are clamped between steel plates. No chance to wear to a loose jointed shaky bolt clipper.



Straight and End Cut

Style N

Straight End Cut With Nut Splitter
